

Monroe 2020PlusII

The Monroe 2020PlusII

Every Monroe calculator comes with a built-in feature no other machine can offer: 90 years of experience. Experience gained by over nine decades of listening to customers, analyzing how they use calculators, and then designing and building machines that answer those needs.

No compromise on performance

The 2020PlusII's full 12-digit entry and calculating capacity gives it the muscle to cope with today's and tomorrow's office needs. It places a wide array of productivity-oriented features at your fingertips - such as Percent Change, Mark-Up, GT, Tax and a 4-key Independent Memory - making it the intelligent choice for a wide variety of calculating needs.

A keyboard designed to make your job easier

The keyboard arrangement of the 2020PlusII is typical of Monroe's effort to make data entry simple, fast, and as error-free as possible. Adding machine controls are placed on the right of the numeric keypad and calculator controls are to the left, making it easy to use them independently or together.

Standard Features

Automatic Constants for x and ÷. This time-saving feature eliminates the job of repetitively reentering a figure which remains constant in a series of calculations involving, for example, multiplication or division.

Percent Increase/Decrease. Percent Increase, for example, can help you calculate sales tax and add it to the price of an item. Percent Decrease, typically can be used to help determine the final price of an item on sale by calculating a percentage and deducting it from the sale price.

Automatic Group and Grand Total. Group and Grand Total allows you to arrive at your first group of totals and automatically store them in grand total memory. Then to arrive at the Grand Total, just depress the GT Key, and you've automatically got your answer. The 2020PlusII lets you say goodbye to time consuming, error causing manual transfers of totals once and for all.

Special Features

- Repeat Addition/Subtraction
- Underflow
- Non-Add/Date
- Sequential Calculations
- N Count
- Back Space
- Rounding Up (↑), Off (5/4), Truncate (↓)
- Change Sign
- Print/Display or Display Only
- %Δ
- TAX
- MU
- GT

Specifications

Calculating Capacity	12 digits
Print Speed	4.1 lines per second
Print Height	.11"/2.8 mm
Print On/Off Switch	Simultaneous print & display or display only
Independent Memory	4 key
Decimal Selector	+, F, 0, 2, 3, 4, 6
Output	Fixed or floating
Input	Floating
Keyboard	7 level buffered
Rollover	2 keys
Dimensions (inches) (millimeters)	8.0"(W) x 11.0" (D) x 2.5" (H) 203 mm (W) x 279 mm (D) x 64 mm (H)
Weight	3.8 lbs/1.7 kg
Power Requirements	117V AC, 50/60 Hz, 230V AC, 50 Hz
Operational Environment	32° to 105°F (0° to 40°C)
