

# monroe ultimate

The **ultimate** is just that, the ultimate Monroe calculator.

Monroe's experience, clearly evident in every detail of design and function.

The velvet touch of IKT (individual keyswitch technology) immediately responds to your touch. A huge green fluorescent display pampers your eyes. The enclosed paper roll protects your investment, while spare supplies storage compartments enhance your productivity. Editing capability and trademark functions make this the ultimate, dare we say, adding machine.

## Key Features

Type	Heavy Duty Desktop Print/Display Calculator
Capacity	12 Digit Print/Display, 24 Digit Calculating
Print Speed	5.0 Lines Per Second
Inking System	Black/Red Ribbon Cartridge or Black/Red Spool Ribbon

Profit	Calculate Cost, Sell or Margin, 1/x (reciprocal) and % change
Memory II	Second fully independent four key memory and Reverse
Crossfooting	Sum columns and rows automatically, compute proration, percent distribution, averaging, more

## Design - Exclusive to Monroe

### Eye Popping Display

A new display 30 to 50% larger than most. It is our largest in vivid "eye ease" green fluorescent.

### IKT Keyboard

IKT (Individual Keyswitch Technology). The most responsive keyswitch technology employed on any calculator. Truly fit for the fastest operators.

### Enclosed Paper Roll - Spare Storage Areas

The paper roll is enclosed to prevent premature printer failure commonly caused by dust and dirt adhering to external paper rolls. A storage area for that extra roll of paper, ribbon cartridge or twin spool ribbon is the ultimate in convenience.

### Adding Machine and GT Register Indicator Lamps

The most common function performed on any calculator is addition and subtraction. Monroe is the only company providing an indicator lamp for the adding machine and Grand Total register. This lamp lights when there's an amount in the adding machine or GT register. Eliminates the need to press total or clear before adding.
